

I have been a faithful listener and supporter of Airl radio for a number of years. I am a mother of three boys of various ages and have found this station to be the only one that I can play in the morning on the way to school without concern of what the content may be.

I believe that it is important to allow Airl to continue its broadcast and not to be displaced by an LPFM broadcaster because it provides my community an alternative to the many other radio stations that do not provide such positive content. I would be very distressed if my station was no longer broadcasted in my community and believe that it would have a negative impact on the many other listeners in my neighborhood.

Please consider the impact that this potential change may have on many people, including myself. As a mother, my top priority is to provide a safe environment for my children. Airl provides me with a way to allow my children to hear music and news in a positive way.

I am sure that this also applies to many other mothers in my community.

Thank you for your time and consideration.
